- Ŷ Servers & Network
- Ŷ Storage & Security
- Ŷ MS Licenses
- Ŷ Annual Maintenance

SERVERS & NETWORK

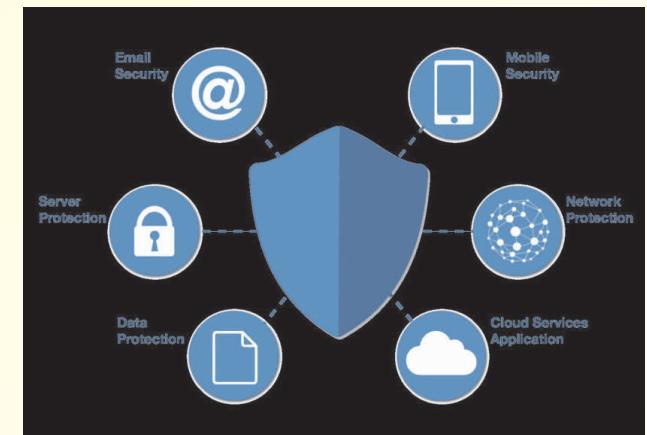

For any successful IT environment a solid, reliable and scalable platform consisting of Servers, Networking and Backup technologies are required. Rubix has designed, installed and deployed several server/networking & backup solutions. Our clients include single location Medium businesses to large multi-site enterprises that support thousands of users across PAN India.

Rubix can help you implement proven infrastructure solutions from our partners such as HP, IBM, Cisco, etc. We combine robust technologies to establish powerful platforms that are scalable, flexible and agile. The result is a dynamic infrastructure that aligns with your business objectives.

Storage and data protection solutions which are critical to the success of any company, where you're looking to reduce the cost through storage consolidation, capacity utilization, and content management & distribution. Thus ensuring business continuity through disaster recovery, high availability and centralized backup. At Rubix, with our expertise in SAN, NAS, DAS and networking environment and our technology alliances with storage market leaders like Synology, Tandberg etc. we can play a significant role.

STORAGE & SECURITY

Rubix provides comprehensive security solutions through a lifecycle approach. The core of a successful security program is an inclusive security policy that provides a management framework for securing information and making it available to authorized persons on demand. We have a proactive approach to security with the goal of developing intelligent self-defending networks that eliminate most risks to customers' assets. Our solutions emphasize knowledge transfer that will allow organizations to successfully monitor and manage their IT security going forward.

Customer satisfaction rises and innovation thrives. And as you grow, you can count on unrivaled scalability and flexibility to support every location, from small branches to corporate headquarters. Contact Rubix-Tech to start defining the right unified communications solution for your business.

DIGITAL SIGNAGE SOLUTIONS

Rubix-Tech's Signage Solutions are bringing yet more game-changing features such as a powerful quad-core processor and Android on board and some of our touch models to offer fully customisable apps based on your own requirements, as a all-in-one integrated solutions.

DATA CENTER & CLOUD COMPUTING

Infinite Datacenter

Rubix-Tech works with customers in their journey into the hyper-converged hybrid compute infrastructure – Infinite Datacenter, building a digital enterprise without owning IT infrastructure. Our approach considers customer's existing investments in IT infrastructure, specific requirements such as compliance and enabling elasticity (grow & shrink) in IT infrastructure in sync with dynamic business requirements.

Enterprise Cloud Services

With the global business scenario becoming increasingly volatile, enterprises are wary of making heavy capital expenditure on IT infrastructure. If the IT projects do not take off as expected, enterprises will be left with expensive IT infrastructure without making complete use of them. On the other hand if they need to commission infrastructure in short notice, they will not have enough time to evaluate all the alternatives and may end up spending more than required. Hence enterprises are looking at ways to scale their IT infrastructure up or down in short notice based on the business needs.
